

“Autumn carries more gold in its pocket than all the other seasons.”-Jim Bishop

November-In Our Herb Garden:

- Complete harvesting of cold sensitive herbs and apply compost as winter mulch if not done in Oct. You can dry or freeze them for later use.
- Mature herb plants will be high in essential oils and this is a good time to preserve them.
- Cut down on your feeding or fertilizing. Plants utilize much less food when watering has been scaled back as well.
